union, KY 41091

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Shelbyville, KY 40065

We are very concerned about the issue of using the net freely. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The longer the FCC waits the more companies will continue to invest in technologies to censor and manipulate what we can do online. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. We insist that the FCC send a stern message to stop other phone and cable companies that want to follow Comcast's lead and control our Internet experience. We strongly urge you to make Net Neutrality the law and keep tollbooths, gatekeepers, and discrimination off my Internet.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. If we let it continue where will the line be drawn.

Comcast has absolutely no place to regulate what users of the internet can and cannot view. The internet is a public communication network that should be freely available to any and all people, and Comcast has by no means any right to block communications to particular websites. I see this as a time for the FCC to take action against Comcast, and end their control over user browsing. If action is not taken accordingly, it's only time before other companies follow the path of Comcast and begin to perform the same actions. One could argue that Comcast's control is unconstitutional. The internet is a source of knowledge, and a media through which any and every person can speak their voice and if internet service providers begin to block access, they are limiting people's right to free speech. Action needs to be taken, and said action needs to be taken immediately.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Zack McMackin

Louisville, KY 40203

When did America stop being the "Land of the Free"? By allowing Comcast to filter (aka block) internet traffic you are allowing Comcast to desecrate the individual freedoms that this country is based on. Filtering traffic hurts everyone because it means that the services available to the public may not be the best ideas, but will most definitely be the ideas which put the most money into the pockets of the ISPs. The reason the Internet has exploded is because everyone can contribute, not just a select few chosen by a small group in power.

Daniel Merritt

Louisville, KY 40204

After seeing the shady behavior of the FCC when dealing with ownership of media outlets (gave in to corporate interests over the best interests of the American people) and the handling of "obscenities" (Janet Jackson had on a pasty... could Benny Hill even be aired these days?), I have little or no faith you will do the right thing in this case. Please prove me wrong. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Thank you for reading my email. Please, protect the freedom of information. I'm very concerned of the blocking of information by Comcast. It is an attack on free speech and is an example of a abuse of power. I am afraid that efforts such as these by the Comcast company will lead to corruption. We have already seen this kind of Orwellian policies in China. I do understand why a company would block pornography, because of it's negative social impacts. One must consider, however, how controlling information involving news, history, television, educational sites, religion, blogs, instant messaging, emails and much more have the potential to destroy our great nation. The corporate quest for money

can be the root of many evils. Giving away so many rights to these companies will hurt Americas economy. These tactics are used to eliminate competition, manipulate polls, convince your kids that there is no God, and jack up prices. Thank you for reading this very long email. Below is a guideline of action that I think would be very useful in protecting freedom. Remember, dead fish cannot swim upstream. Have a Wonderful Day! Nathan D. Williams 8901 Elks Bluff Dr. 106 Louisville Ky 40220 ----- Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections.
